

Move Forward With **ecotorch**[®]

The new torch-applied roofing membrane that reduces liability, call-backs, and tires in the landfill

Ecotorch[®] is an innovative torch-applied membrane that truly contributes to the environment. Incorporating recycled tires into SBS modified bitumen, ecotorch is a more durable, dependable, and eco-friendly roofing membrane than APP modified bitumen membranes.

AVAILABLE COLORS:

Custom colors available for minimum run of 150 rolls (±15%)

Black CC028

White CC016

Buff CC019

Shakewood CC046

Pewter Gray CC010A

Weathered Wood CC004

Hickory CC047

Yosemite Green CC074A

FEATURES:

- Same application process – no retraining necessary
- Vastly superior to APP in nearly every way – at roughly the same price
- Superior end-lap, metal, and granule adhesion
- Superior low-temperature flexibility
- Reduces liability
- Fewer call-backs
- Recycled content helps the environment
- Available in 8 different shingle blends/solid colors. Custom colors available for minimum run of 150 rolls (±15%)
- Each roll uses approximately one half of one passenger tire
- More efficient torch-down system uses less heat/propane
